I. A Lendület Program 2024. évi pályázati felhívása új Lendület-kutatócsoportok létrehozására 2024–2029 - The Hungarian Academy of Sciences launches a call for applications to establish new Lendület “Momentum” research groups 2024–2029

A Lendület Program keretében az MTA pályázati felhívást tesz közzé 2024-ben induló kutatócsoportok létrehozására. A Lendület Program célja a hazai fiatal kutatóbázis erősítése nemzetközi szinten is kimagasló teljesítményű kutatók és kiemelkedő fiatal tehetségek külföldről való hazahívásával, illetve itthon tartásával, és ezzel egyidejűleg a fiatal kutatók önállósodási törekvéseinek támogatása. A Lendület Program a kiválóság és a mobilitás együttes támogatására irányul, ennek megfelelően célja, hogy a befogadó kutatóhelyeken áttörő eredményeket ígérő kutatásokat végző kutatócsoportok számára biztosítson forrást.

A pályázatokat angol nyelven kell benyújtani a Lendület elektronikus pályázati rendszeren keresztül. Bölcsészet- és társadalomtudományi pályázatok esetében indokolt esetben csak magyar nyelvű pályázat is benyújtható. A pályázati anyagok feltöltésének határideje **2024. február 12. 16:00**.

Határidő: **2024. február 12. 16:00**

II. Equipping Your Teams to Increase Funding Successes

In this conference participants can get to know better how to leverage connections between funder data, previously awarded grants, and researcher profiles to better inform their proposals and their funding strategies. Moreover, those who are interested can get an insight how to secure more funding and strengthen teams with less effort using unique funding experience derived from an integrated suite of solutions (Web of Science, Pivot-RP, and InCites Benchmarking & Analytics). Last but not least, there will be given the opportunity to discover and analyse linked, curated data that reveals connections between awarded grants, funders, research outputs, and currently available funding opportunities to increase chances of success.

Date: **29 January 2024, 14:00-15:00 CET**

Place: **Online**

For more information and registration visit this [Page](#).

III. Science Europe High Level Conference on Science Communication

The High Level Conference on Science Communication is co-organised by the Research Foundation Flanders (FWO), Fund for Scientific Research (F.R.S.-FNRS), and Science Europe under the auspices of the Belgian Presidency of the European Union (January–June 2024), and will take place in a **hybrid format** between **12-13 March 2024**.

In recent years, researchers have become increasingly involved in public communication programmes; the COVID-19 pandemic and other global challenges have accelerated this trend. Despite this, misinformation and ‘fake news’ about important social issues – such as artificial intelligence, big data, food security, energy, and climate change – continue to spread through social and new media. This has led to growing international recognition that science communication is an essential aspect of research culture.

The conference will bring together European policy makers and stakeholders to highlight the importance of open, ethical science communication in research processes. It will also raise awareness of the need to address science communication more formally in research programmes.

Date: **12-13 March 2024**

Place: **Hybrid**

Registration: **before 12.03.2024**, [Here](#)

IV. Panel for the Future of Science and Technology (STOA) annual lecture on ‘Making democracy work’

Under the aegis of the European Science Communication, and with the collaboration of the Panel for the Future of Science and Technology (STOA), “Making democracy work” lecture will be organized **on 24 January 2024**. Speakers will discuss challenges and solutions for democratic inclusion across generations, personal situations, and global contexts. Following that crucial up-to-date topics will be examined such as generational democratic gaps, digital democratic and new forms of democratic participation. Before the closing remarks, participant will be given the opportunity to ask questions from speakers.

Date: **24 January 2024, 15:00-16:50**

Place: **Brussels and webstreamed**

For further information and registration click [Here](#).

V. Other upcoming events

- Navigating Taiwan: Business and IP Best Practices for Eastern Europe SMEs

The webinar, aiming to provide European SMEs from all sectors facing the challenges posed by the green sustainability ecosystem, covers a range of discussion points relevant to a comprehensive view of doing business in Taiwan and how to participate in green procurement policies along with key concerns about IP protection. It is designed to help Polish, Hungarian and Serbian SMEs navigate China's complex landscape with confidence by incorporating good strategies, such as anti-unfair competition remedies and infringements' best practices, for both market entry and crafting a robust IP strategy. This ensures that businesses are secure and poised for success in the world's second-largest economy. The registration for this webinar is free and it will be held on **16 January 2024**. Those who are interested can register [Here](#).

- EARTO Recommendations regarding the Evaluation & Pre-contractual Negotiations of Lump-sums EU Funded RD&I Projects

EARTO members are very active participants in the EU RD&I Frameworks Programmes (FPs), especially in complex and large collaborative applied RD&I projects. In this context, EARTO Feedback on EARTO Members' Experiences with Lump-Sums Projects within Horizon Europe addressed wider issues related to lump-sums funding within Horizon Europe. With the recent announcements and discussions pointing to the possible extension of the use of this funding principle, EARTO members wish to alert the EU Institutions on worrying trends and signals regarding the evaluation and pre-contractual negotiations of lump-sums EU-funded RD&I projects. Indeed, with many newly selected projects using the lump-sums funding scheme under Horizon Europe, EARTO members have now proper feedback on their granting process and the issues that are rising. You can read the the full position paper [Here](#).

VI. Open events and applications

Az alábbiakban új rovatként, táblázatos formában tájékoztatást adunk azon nyitott eseményekről és pályázatokról, melyek az előző hírlevelekben megjelentek.
