Eurostars is a funding instrument that supports innovative SMEs and project partners (that vary from large companies to universities, research organisations and other types of organisations) by funding international collaborative R&D and innovation projects. By participating, organisations can access public funding for international collaborative R&D projects in all fields. Your project consortium must have an innovative SME in the leading role, but it can also include other types of organisations like large companies, universities, research organisations and more.

The upcoming submission period for R&D and innovation projects will be open between **12 July 2024 to 12 September 2024**.

V. CoARA's First Call for Cascade Funding – Information session

An online information session for parties interested in submitting an application to CoARA Boost's first Cascade Funding Programme, with time dedicated to Q&A. This call for Cascade Funding within CoARA Boost aims to enhance institutional change and target pilot and exchange-of-knowledge initiatives. This first call will fund +20 projects facilitating knowledge-exchange, piloting new initiatives within institutions, and enabling lasting institutional change. As such, it encourages and supports research organisations to investigate and test what will efficiently work 'in real life'.

As the call is meant to support institutions from across the European Research Area (ERA), eligible applications are limited to legal entities based in the EU Member States and countries associated to the Horizon Europe Framework Programme for Research and Innovation. The types of organisations eligible for funding are detailed in the call text.

Place: **Online**

Date: **3 June 2024, 14:00-15:00 CEST**
